Vertex AI

COMPETITIONS

Hungarian National IT Competition (OITM)

2024: 34th, language-independent programming (957 entrants, top 4%)

2025: 47th, language-independent programming (730 entrants, top 7%) and 47th, Python (640 entrants, top 8%)

Senior full-stack developer: I build and run web products.

From late 2021 I developed and ran a Hungarian real estate listing platform that I built from scratch. Since 2025 I have built my own SaaS products, EU-hosted infrastructure and AI integrations, and since 2026 Claude Code has been part of my daily workflow. 30+ completed projects, 50,000+ monthly visitors.

EXPERIENCE

- 2025 -

Own SaaS and AI products, developer and operator

Self-built products, running on my own servers

 - Dev Radar: IT job aggregator with 70,000+ listings, FastAPI and PostgreSQL, AI search, own MCP server, bot protection against 1.9 million automated requests a week.
 - Tilezza: EU-hosted map tile and geocoding service. Analyzza and Analyzza Zero: self-hosted web analytics, and a cookie- and banner-free variant.
 - Radar site family (15 live sites, e.g. tuzradar.hu, aramradar.hu) on Node.js and SQLite; b2bstock.eu, a multilingual B2B marketplace.
- 2021-2026

Real estate listing platform, developer and operator

External developer of a Hungarian real estate listing platform

 - Built from scratch: framework-free PHP with its own routing, authentication and data layer, a REST API and scheduled background jobs.
 - Data integration with agency software, online payments, automated invoicing, fraud monitoring, moderation, AI search.
 - Updates and extensions shipped under live traffic, following documented procedures. 50,000+ listings, 1,000+ registered agents and agencies.
- 2020 -

Self-employed, full-stack development and operations

Full-stack development in client projects, from requirements to release, on servers I run myself

CLAUDE CODE AND AI IN PRACTICE

- Claude Code is part of my daily development workflow, with project-specific rules and automated checks.
- Guardrails: hooks block access to secret files, the database and sudo; a dedicated OS user, AppArmor, PII masking.
- Anthropic API in production: chatbot, analyses, generators; my own MCP server; Gemini on Vertex AI in the EU region. I use AI for speed; technical decisions and checking the finished code are my job.

WHAT I CAN HELP WITH

- Building a web product from scratch, through release and operations.
- Extending, modernising and migrating a live system.
- AI integration: Anthropic API, MCP servers, Claude Code workflows.
- Data integration with external systems, APIs and background jobs.

SELECTED WORK

Dev Radar · devradar.hu

IT job aggregator with its own MCP server

b2bstock.eu · b2bstock.eu

Multilingual European B2B stock marketplace

Earthquake Radar · earthquakeradar.net

Live earthquake map from USGS data

Áramradar · aramradar.hu

Live electricity map from MAVIR and ENTSO-E data

Kutyapp · kutyapp.hu

Map of dog-related places in Hungary

Digital Dynamics · digitaldynamics.hu

Custom development, ERP, SaaS and AI automation

Tilezza · tilezza.eu

EU-hosted map infrastructure

Analyzza Zero · zero.analyzza.com

Cookie-free web analytics

Tornado Live Map · tornadolivemap.com

Live US tornado map from NOAA data

Túzradar · tuzradar.hu

Live European wildfire map from NASA satellite data

Pénzkalkulátor · penzkalkulator.hu

Hungarian finance calculators on official data
